Borovička J. (2008): The correct author citation of the recently published name *Pluteus fenzlii*. – Czech Mycol. 60(1): 123–124.

The combination *Pluteus fenzlii* (Schulzer) Corriol et P.-A. Moreau was published 23 days before the combination *Pluteus fenzlii* (Schulzer) E. Malyszheva, Morozova et Zvyagina and, therefore, has priority.

**Key words:** Basidiomycetes, Agaricales, *Pluteaceae*, nomenclature.

Borovička J. (2008): Správná citace autorů u nedávno publikovaného jména *Pluteus fenzlii*. – Czech Mycol. 60(1): 123–124.

Kombinace *Pluteus fenzlii* (Schulzer) Corriol et P.-A. Moreau byla publikována o 23 dní dříve než kombinace *Pluteus fenzlii* (Schulzer) E. Malyszheva, Morozova et Zvyagina, a má tedy priorititu.

RESULTS AND DISCUSSION

For tens of years, *Agaricus fenzlii* Schulzer has been placed in the genus *Chamaeota* (W. G. Sm.) Earle (e. g. Singer 1986). However, recent studies (Corriol and Moreau 2007, Malyszheva et al. 2007) have revealed that the species should be placed in *Pluteus* Fr. In both studies, the new combination *Pluteus fenzlii* was designated. A question has appeared which combination has priority and which should be considered an “isonym” without nomenclatural status.

In *Persoonia* 19(2): 248, the combination *Pluteus fenzlii* (Schulzer) Corriol et P.-A. Moreau was published. According to Connie Baak, the desk editor of *Persoonia* (April 2008, pers. comm.), the printed version of this journal number was available on the 8th of August 2007; the same date has been indicated also in the electronic version of *Persoonia* [<http://www.ingentaconnect.com/content/nhn/pimj/2007/00000019/00000002/art00003> (accessed 21th April 2008)]. The librarian Alena Kubátová has confirmed (April 2008, pers. comm.) that *Persoonia* 19(2) was received in August 2007 by the library of the Czech Scientific Society for Mycology in Prague which is the confirmation of the dates given by the editors of *Persoonia*.

In *Acta Mycologica* 42(2): 155, the combination *Pluteus fenzlii* (Schulzer) E. Malyszheva, Morozova et Zvyagina was published. According to Maria Ławrynowicz, the editor of *Acta Mycologica* (March 2008, pers. comm.), this journal number went out from the print on 31th of August 2007 and was available during the 54th Conference of Polish Botanical Society (3–8th September 2007) in Szczecin.

According to the International Code of Botanical Nomenclature (McNeill et al. 2006; Art. 6.3, Note 2), “when the same name, based on the same type, has been published independently at different times by different authors, then only the earliest of these “isonyms” has nomenclatural status”. Consequently, the correct name of *Agaricus fenzlii* Schulzer within the genus *Pluteus* is as follows:

***Pluteus fenzlii* (Schulzer) Corriol et P.-A. Moreau**, *Persoonia* 19(2): 248. 2007

≡ *Pluteus fenzlii* (Schulzer) E. Malyszheva, Morozova et Zvyagina, *Acta Mycol.* 42(2): 155. 2007 [a later isonym, without nomenclatural status; ICBN Art. 6.3, Note 2]

#### ACKNOWLEDGEMENTS

I thank Connie Baak, Alena Kubátová and Maria Ławrynowicz for providing information on dates of publishing/receiving of the journals and Vladimír Antonín and Jan Holec for critical comments on the manuscript. I also thank Michal Mikšík who was actively involved in origination of this study. This investigation was indirectly supported by the Institutional Research Plans (IRP) AV0Z30130516 (Institute of Geology, AS CR, Prague) and IRP AV0Z10480505 (Nuclear Physics Institute, AS CR, Řež near Prague).
